

## Parker Series 2A Air Cylinder

When the job calls for reliable, heavy-duty performance, specify Series 2A. A 100,000 psi yield strength chrome-plated, case-hardened piston rod. A 125,000 psi yield strength rod-end stud with rolled threads. 100,000 psi yield strength tie rods. With construction like this, the Parker Series 2A is rated for air service to 250 psi. This is one heavy-duty air cylinder that's really heavy duty.

They're truly premium quality cylinders, factory prelubricated for millions of maintenance-free cycles. And to make sure every cylinder is premium quality, we subject each and every one – not just batch samples – to tough inspection and performance tests. See pages 18 and 19 for the inside story on all the features that make Series 2A the high performance, long lasting choice for all your heavy-duty air applications.

---

For additional information – call your local Parker Cylinder Distributor.

# Series 2A Heavy Duty Air Cylinders

Specifications/  
Mountings

## Standard Specifications

- Heavy Duty Service – NFPA Specifications and ANSI B93.15-1981 Mounting Dimension Standards
- Standard Construction – Square Head – Tie Rod Design
- Nominal Pressure – Up to 250 PSI Air Service
- Standard Fluid – Filtered Air
- Standard Temperature – -10°F to +165°F.
- Bore Sizes – 1" through 14" (Larger sizes available)

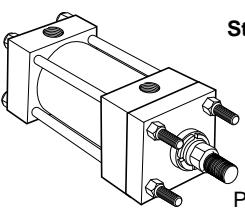

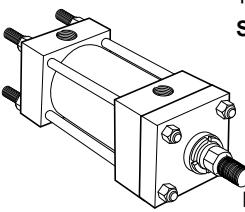

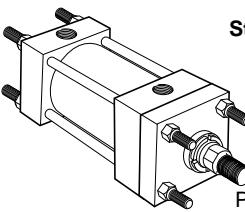

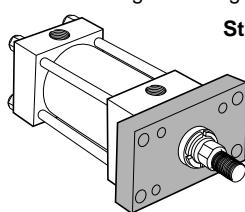

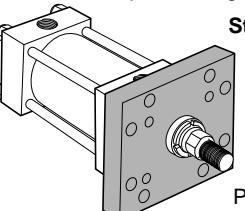

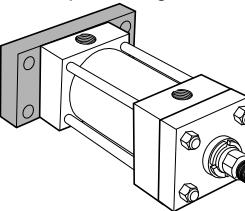

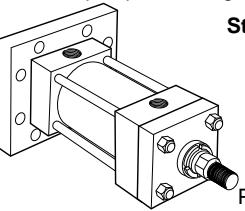

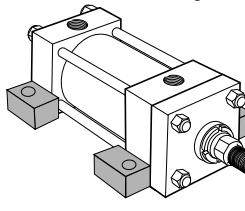

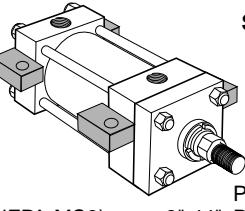

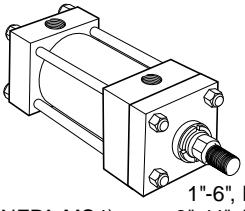

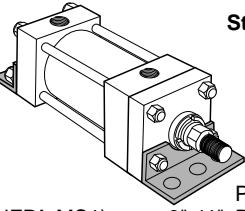

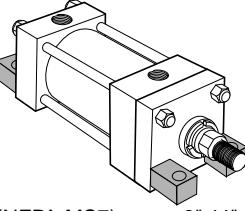

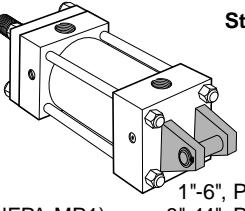

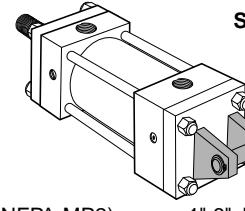

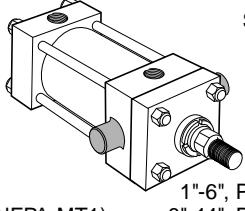

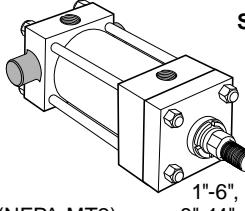

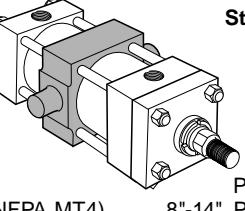

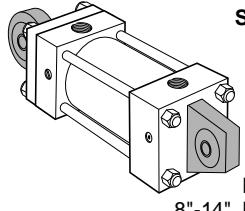

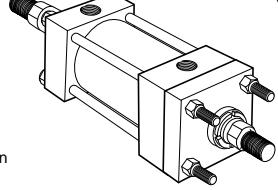

*In line with our policy of continuing product improvement, specifications in this catalog are subject to change.*

Note: Series 2A Air Cylinders fully meet NFPA Standards and ANSI Standard B93.15-1981 for Mounting Dimensions for Square Head Industrial Fluid Power Cylinders.  
Parker Style TB, JB, HB, C, DB, and BB are available in 7" bore size, see page 32.

- Piston Rod Diameter – 1/2" through 5 1/2"
- Mounting Styles – 17 standard styles at various application ratings
- Strokes – Available in any practical stroke length
- Cushions – Optional at either end or both ends of stroke. "Float Check" at cap end.
- Rod Ends – Three Standard Choices – Specials to Order

\*See section C, "Operating Fluids and Temperature Range" for higher temperature service.

**Parker**  
Cylinder

# The inside story on why series 2A is your best choice in heavy duty pneumatic cylinders

## Adjustable floating cushions

Cushions are optional, and can be supplied at head end, cap end, or both ends without change in envelope or mounting dimensions. All Parker cushions are adjustable. The Series 2A cylinder design incorporates the longest cushion sleeve and cushion spear that can be provided in the standard envelope without decreasing the rod bearing and piston bearing lengths.

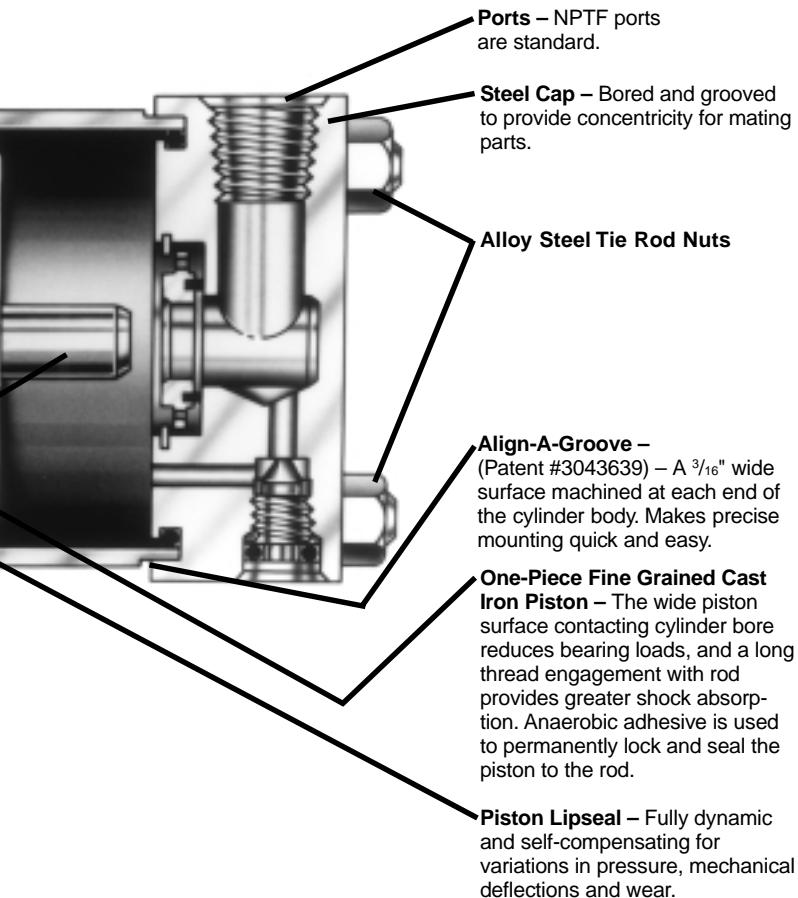

- (1) When a cushion is specified at the head end:
  - a. A self-centering sleeve is furnished on the piston rod assembly.
  - b. A needle valve is provided that is flush with the side of the head when wide open. It may be identified by the fact that it is socket-keyed. It is located on side number 2, in all mounting styles except D, DB, DD, and E. In these styles it is located on side number 3.
  - c. A springless check valve is provided that is also flush with the side of the head and is mounted

adjacent to the needle valve except on certain bores of mounting style C where it is mounted opposite the needle valve. It may be identified by the fact that it is slotted.

- d. The check and needle valves are interchangeable in the head.
- (2) When a cushion is specified at the cap end:
  - a. A cushion spear is provided on the piston rod assembly.
  - b. A "float check" self-centering bushing is provided which incorporates a large flow check valve for fast "out-stroke" action.
  - c. A socket-keyed needle valve is provided that is flush with the side of the cap when wide open. It is located on side number 2 in all mounting styles except D, DB, DD, and E. In these styles it is located on side number 3.

For additional information – call your local Parker Cylinder Distributor.

**Piston Rod** – Medium carbon steel, induction case-hardened to 54 R<sub>c</sub>, hard chrome-plated and polished to 10 RMS finish. Piston rods are made from 90,000 to 100,000 psi minimum yield material in 1/2" through 4" diameters. Larger diameters vary between 57,000 and 90,000 psi minimum material, depending on rod diameter. The piston thread equals the catalog style #4 rod end thread for each rod diameter to assure proper piston-to-rod thread strength. Two wrench flats are provided for rod end attachment.

## The exclusive “Jewel” gland gives you longer cylinder life, better performance and lower costs.

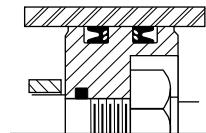

A

An extra-long inboard bearing surface insures lubrication from within the cylinder. Outboard of the bearing surface are two leakproof seals – The Lipseal and Wiperseal. The serrated Lipseal (primary seal) is completely self-compensating and self-relieving. It adjusts to mechanical deflections or any pressure variation from near-zero to rated operating pressure. The result is positive, no-leak sealing – regardless of conditions.

The Wiperseal does double duty. On the advance stroke, it acts as a secondary pressure seal. On the return, it wipes away any dirt on the rod. This means less wear on bearing surfaces and internal parts. Longer life for working parts. And, less loss of fluid. Plus, you can replace a “Jewel” gland without removing the tie rods or the retainer. Just a few twists with a spanner wrench does the job.

### Prelubricated Wearing Surfaces

Parker Series 2A Air Cylinders are factory prelubricated. Lube-A-Cyl applied to seals, piston, cylinder bore, piston rod and gland surfaces provides lubrication for normal operation. Lube-A-Cyl has been field and laboratory tested, and is recommended by Parker for air cylinders where lubricant should remain in the cylinder and not be expelled into the atmosphere.

**Piston with Retainer Nut –**  
Optional at extra charge.

### Cushion Length

Cylinder Bore (Inches)	Rod Diameter* (Inches)	Rod Number	Cushion Length (Inches)	
			Head*	Cap
1 1/2	5/8	1	7/8	13/16
	1	2	7/8	13/16
2	5/8	1	7/8	13/16
	1 3/8	2	7/8	13/16

Tie Rod and  
Rectangular Flange Mountings  
1" to 6" Bore Sizes

# Series 2A Heavy Duty Air Cylinders

Tie Rods Extended  
Style TB  
(NFPA Style MX3)

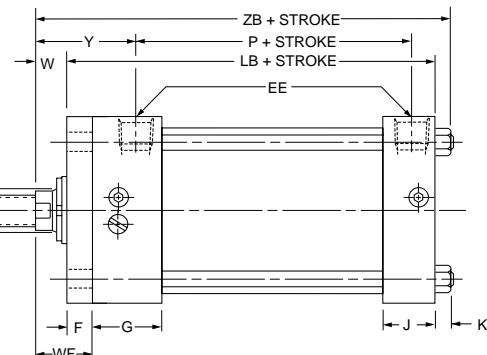

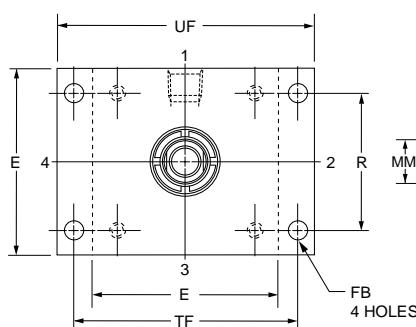

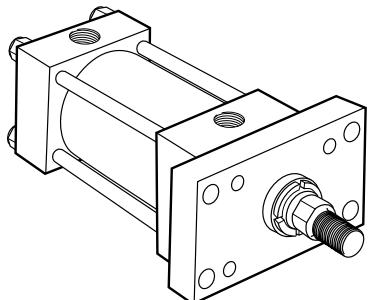

Basic Mounting (T) —  
NFPA MX0 — no tie rods extended can be supplied upon request.

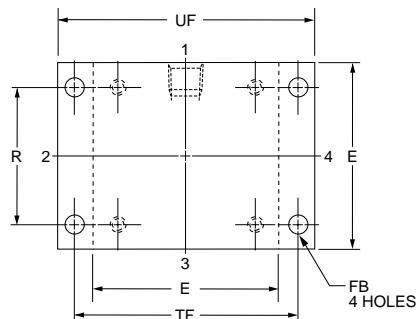

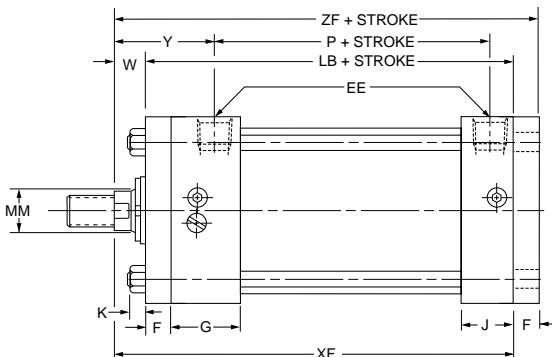

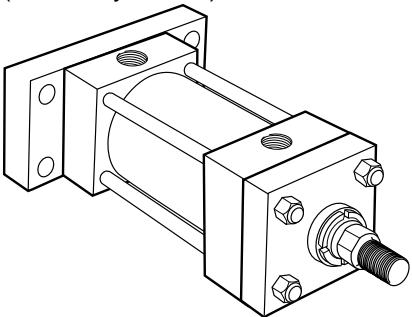

Style TB (NFPA MX3). Head Tie Rods Extended, illustrated: Style TC (NFPA MX2), Cap Tie Rods Extended; and Style TD (NFPA MX1), Both Ends Tie Rods Extended are also available. All "T" styles can be dimensioned from Style TB drawing at right.

Head Rectangular Flange  
Style J  
(NFPA Style MF1)

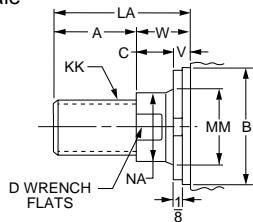

Cap Rectangular Flange  
Style H  
(NFPA Style MF2)

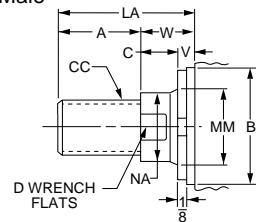

Rod End Dimensions — see table 2

Thread Style 4  
(NFPA Style SM)  
Small Male

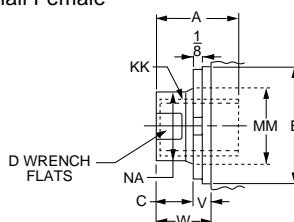

A high strength rod end stud is supplied on thread style 4 through 2" diameter rods and on thread style 8 through 1 1/8" diameter rods. Larger sizes or special rod ends are cut threads. Style 4 rod ends are recommended where the workpiece is secured against the rod shoulder. When the

Thread Style 8  
(NFPA Style IM)  
Intermediate Male

workpiece is not shouldered, style 4 rod ends are recommended through 2" piston rod diameters and style 8 rod ends are recommended on larger diameters. Use style 9 for applications where female rod end threads are required. If rod end is not specified, style 4 will be supplied.

Thread Style 9  
(NFPA Style SF)  
Small Female

**"Special" Thread  
Style 3**

Special thread, extension, rod eye, blank, etc., are also available.

To order, specify "Style 3" and give desired dimensions for CC or KK, A and LA. If otherwise special, furnish dimensioned sketch.

For additional information – call your local Parker Cylinder Distributor.

A high strength rod end stud is supplied on thread style 4 through 2" diameter rods and on thread style 8 through 1 1/8" diameter rods. Larger sizes or special rod ends are cut threads. Style 4 rod ends are recommended where the workpiece is secured against the rod shoulder. When the

workpiece is not shouldered, style 4 rod ends are recommended through 2" piston rod diameters and style 8 rod ends are recommended on larger diameters. Use style 9 for applications where female rod end threads are required. If rod end is not specified, style 4 will be supplied.

### "Special" Thread Style 3

Special thread, extension, rod eye, blank, etc., are also available.

To order, specify "Style 3" and give desired dimensions for CC or KK, A and LA. If otherwise special, furnish dimensioned sketch.

For additional information – call your local Parker Cylinder Distributor.

A high strength rod end stud is supplied on thread style 4 through 2" diameter rods and on thread style 8 through 1 1/8" diameter rods. Larger sizes or special rod ends are cut threads. Style 4 rod ends are recommended where the workpiece is secured against the rod shoulder. When the

workpiece is not shouldered, style 4 rod ends are recommended through 2" piston rod diameters and style 8 rod ends are recommended on larger diameters. Use style 9 for applications where female rod end threads are required. If rod end is not specified, style 4 will be supplied.

**"Special" Thread Style 3**

Special thread, extension, rod eye, blank, etc., are also available.

To order, specify "Style 3" and give desired dimensions for CC or KK, A and LA. If otherwise special, furnish dimensioned sketch.

For additional information – call your local Parker Cylinder Distributor.

\* Cushions not available on 1" bore.

\*\* On 1", 1 1/2", 2" and 2 1/2" bore sizes, the head-end (only) pipe thread is not full depth on cylinders with No. 2 rods. Minimum of three full threads available.

† Mounting style CB available in 1" bore for rod No. 1 only.

‡ Mounting style CB for 1" bore only is furnished with four mounting holes (two each end). Center holes omitted.

■ 1" bore head dimension is 13/4" x 1 1/2". (See illustration in "How to Order Series 2A Cylinders.")

• Mounting style G not available in 1" bore.

\* Mounting style CB available in 1" bore for rod No. 1 only.

• Mounting style G not available in 1" bore.

Caution: When using mounting styles CB and G, check clearance between mounting members and rod attachment or accessory. If necessary, specify longer rod extension to avoid interference with mounting members.

### "Special" Thread Style 3

Special thread, extension, rod eye, blank, etc., are also available.

To order, specify "Style 3" and give desired dimensions for CC or KK, A and LA. If otherwise special, furnish dimensioned sketch.

A high strength rod end stud is supplied on thread style 4 through 2" diameter rods and on thread style 8 through 1 1/8" diameter rods. Larger sizes or special rod ends are cut threads. Style 4 rod ends are recommended where the workpiece is secured against the rod shoulder. When the

workpiece is not shouldered, style 4 rod ends are recommended through 2" piston rod diameters and style 8 rod ends are recommended on larger diameters. Use style 9 for applications where female rod end threads are required. If rod end is not specified, style 4 will be supplied.

For additional information – call your local Parker Cylinder Distributor.

\* Mounting style DD not available in 1" bore.

\*\* Dimension XI to be specified by customer.

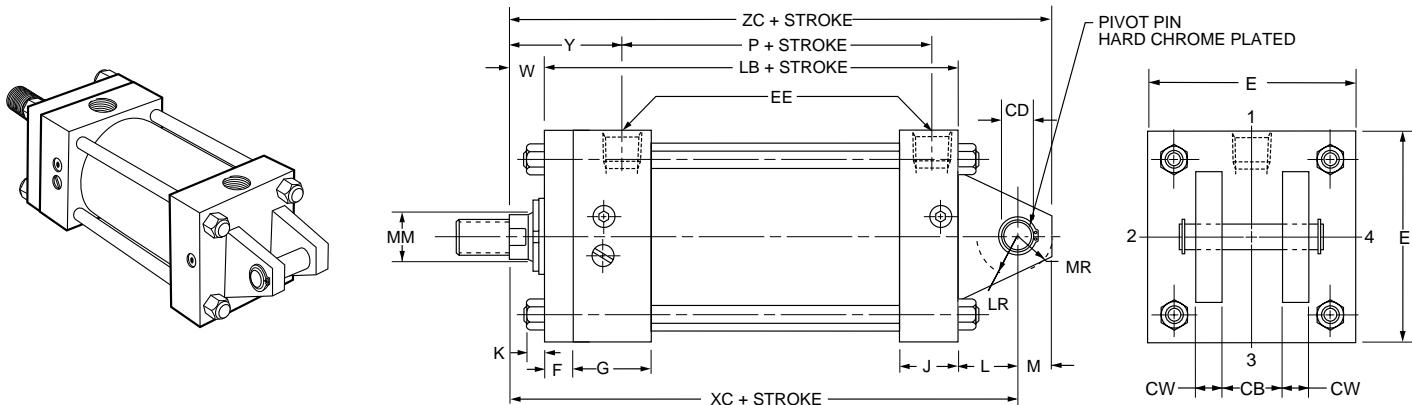

For Cylinder Division Plant Locations – See Page II.

Clevis Mountings  
1" to 6" Bore Sizes

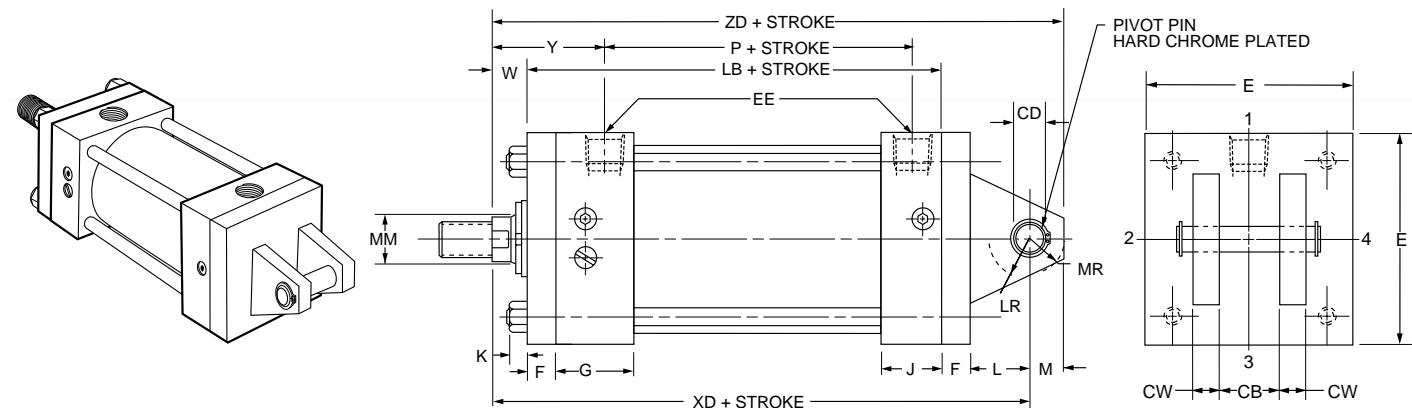

# Series 2A Heavy Duty Air Cylinders

Cap Fixed Clevis  
Style BB  
(NFPA Style MP1)

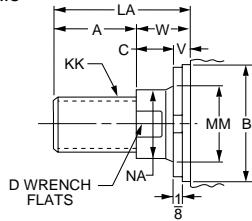

The 1", 4", 5" and 6" bore sizes have tie rod nuts at both ends as shown. Tie rods thread into cap on all other bore sizes.

Cap Detachable Clevis  
Style BC  
(NFPA Style MP2)

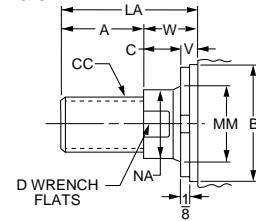

Rod End Dimensions — see table 2

Thread Style 4  
(NFPA Style SM)  
Small Male

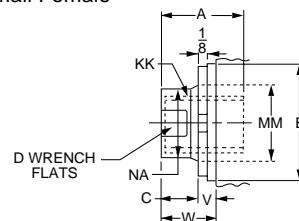

A high strength rod end stud is supplied on thread style 4 through 2" diameter rods and on thread style 8 through 1 1/8" diameter rods. Larger sizes or special rod ends are cut threads. Style 4 rod ends are recommended where the workpiece is secured against the rod shoulder. When the

Thread Style 8  
(NFPA Style IM)  
Intermediate Male

workpiece is not shouldered, style 4 rod ends are recommended through 2" piston rod diameters and style 8 rod ends are recommended on larger diameters. Use style 9 for applications where female rod end threads are required. If rod end is not specified, style 4 will be supplied.

Thread Style 9  
(NFPA Style SF)  
Small Female

**"Special" Thread Style 3**

Special thread, extension, rod eye, blank, etc., are also available.

To order, specify "Style 3" and give desired dimensions for CC or KK, A and LA. If otherwise special, furnish dimensioned sketch.

For additional information – call your local Parker Cylinder Distributor.

(NFPA Style MS2)

Centerline Lugs  
Style E  
(NFPA Style MS3)

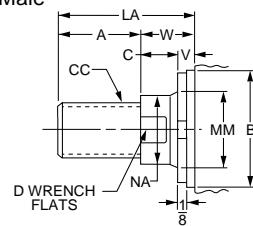

Rod End Dimensions — see table 2

Thread Style 4  
(NFPA Style SM)  
Small Male

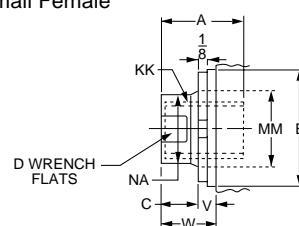

A high strength rod end stud is supplied on thread style 4 through 2" diameter rods and on thread style 8 through 1 1/8" diameter rods. Larger sizes or special rod ends are cut threads. Style 4 rod ends are recommended where the workpiece is secured against the rod shoulder. When the

Thread Style 8  
(NFPA Style IM)  
Intermediate Male

workpiece is not shouldered, style 4 rod ends are recommended through 2" piston rod diameters and style 8 rod ends are recommended on larger diameters. Use style 9 for applications where female rod end threads are required. If rod end is not specified, style 4 will be supplied.

Thread Style 9  
(NFPA Style SF)  
Small Female

**"Special" Thread Style 3**  
Special thread, extension, rod eye, blank, etc., are also available. To order, specify "Style 3" and give desired dimensions for CC or KK, A and LA. If otherwise special, furnish dimensional sketch.

For additional information – call your local Parker Cylinder Distributor.

\* Mounting style G not offered in this rod size.

Caution: When using mounting style G, check clearance between mounting members and rod attachment or accessory. If necessary, specify longer rod extension to avoid interference with mounting members.

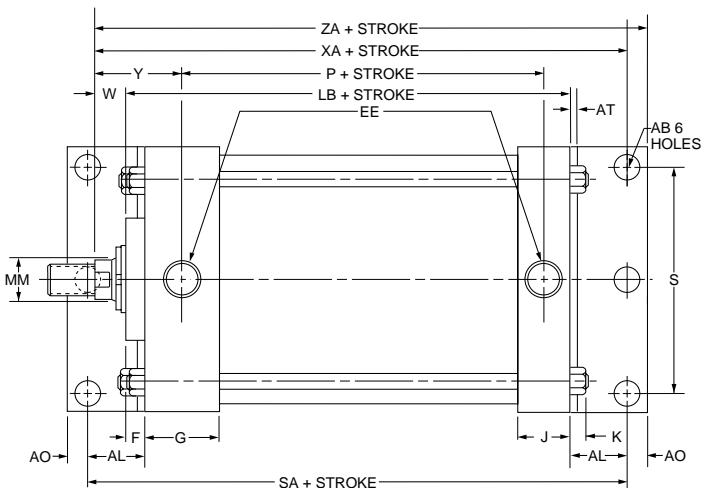

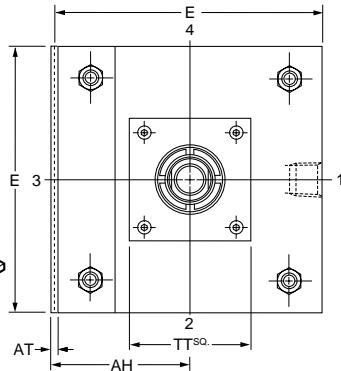

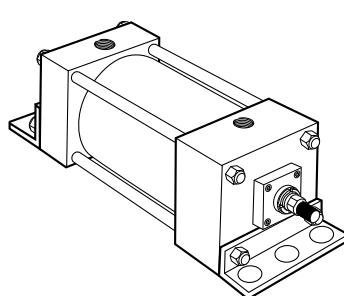

For Cylinder Division Plant Locations – See Page II.

Side End Angle and  
Clevis Mountings  
8" to 14" Bore Sizes

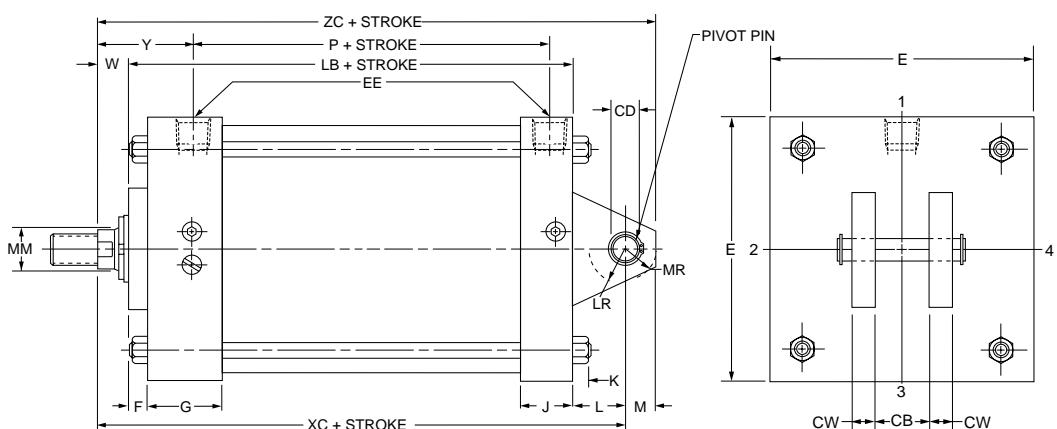

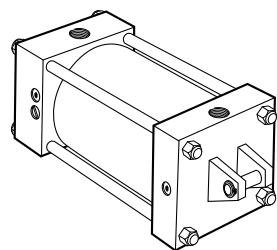

# Series 2A Heavy Duty Air Cylinders

Side End Angles  
Style CB  
(NFPA Style MS1)

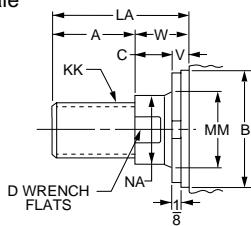

Not offered in the following sizes: 8" bore, rod codes #2, 6, 7, 8, 9 and 0; 10" bore, rod codes #8, 9 and 0.

Cap Fixed Clevis  
Style BB  
(NFPA Style MP1)

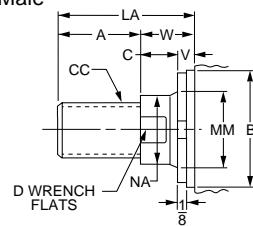

Rod End Dimensions — see table 2

Thread Style 4  
(NFPA Style SM)  
Small Male

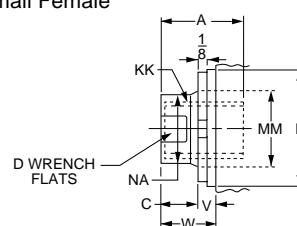

A high strength rod end stud is supplied on thread style 4 through 2" diameter rods and on thread style 8 through 1 1/8" diameter rods. Larger sizes or special rod ends are cut threads. Style 4 rod ends are recommended where the workpiece is secured against the rod shoulder. When the

Thread Style 8  
(NFPA Style IM)  
Intermediate Male

workpiece is not shouldered, style 4 rod ends are recommended through 2" piston rod diameters and style 8 rod ends are recommended on larger diameters. Use style 9 for applications where female rod end threads are required. If rod end is not specified, style 4 will be supplied.

Thread Style 9  
(NFPA Style SF)  
Small Female

**"Special" Thread Style 3**  
Special thread, extension, rod eye, blank, etc., are also available. To order, specify "Style 3" and give desired dimensions for CC or KK, A and LA. If otherwise special, furnish dimensional sketch.

For additional information – call your local Parker Cylinder Distributor.

Maximum operating pressure at 4:1 design factor is based on tensile strength of material. Pressure ratings are based on standard commercial bearing ratings.

Note: For additional dimensions see Series 2A, page 30.

\* Dimension CD is hole diameter.

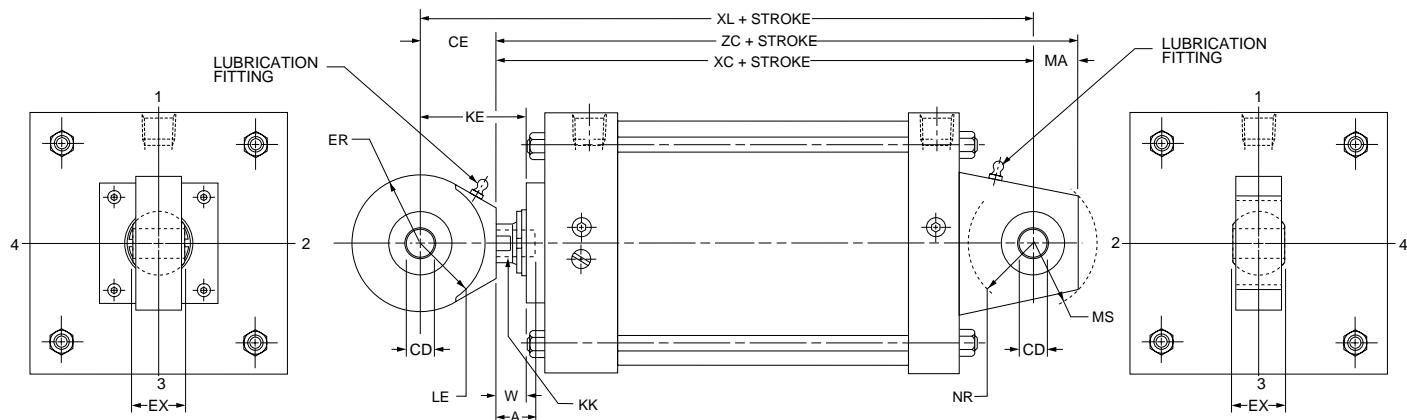

\*\* Corresponding rod eye pin diameter may not match pin diameter of cap.

Rod No. 1 is standard.

### 1"-6" Bores

### 7"-14" Bores

To determine dimensions for a double rod cylinder, first refer to the desired single rod mounting style cylinder shown on preceding pages of this catalog. (See table at left.) After selecting necessary dimensions from that drawing, return to this page supplement the single rod dimensions with those shown on drawings at right and dimension table below. Note that double rod cylinders have a head (Dim. G) at both ends and that dimension LD replace LB and ZL replaces ZB, etc. The double rod dimensions differ from, or are in

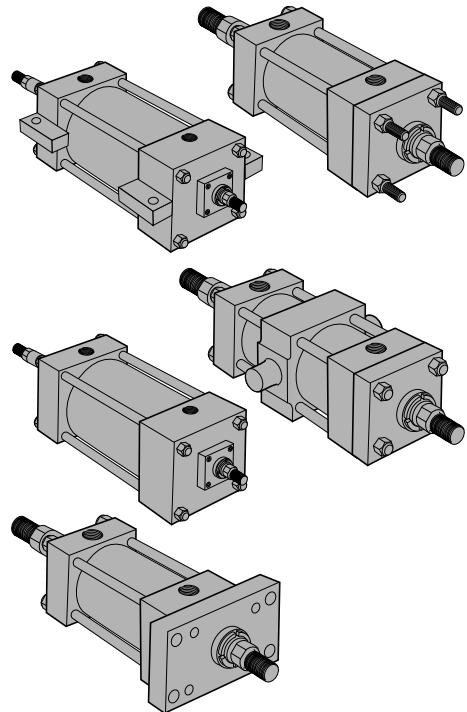

addition to those for single rod cylinders shown on preceding pages and provide the information needed to completely dimension a double rod cylinder.

On a double rod cylinder where the two rod ends are different, be sure to clearly state which rod end is to be assembled at which end. Port position 1 is standard. If other than standard, specify pos. 2, 3 or 4 when viewed from one end only. See port position information in Section C.

All dimensions are in inches and apply to Code 1 rod sizes only. For alternate rod sizes, determine all envelope dimensions (within LD dim.) as described above and then use appropriate rod end dimensions for proper rod size from single rod cylinder.

## **Heavy Duty Air Cylinders**

## Cylinder Accessories Spherical Bearing Mounting Style SB

Parker offers a complete range of Cylinder Accessories to assure you of the greatest versatility in present or future cylinder applications. Accessories offered for the

respective cylinder include the Rod Eye, Pivot Pin and Clevis Bracket. To select the proper part number for any desired accessory refer to the charts below.

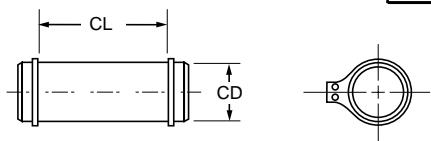

## Spherical Rod Eye

Cylinder

## Cylinder Accessories

### Cylinder Accessories

Parker offers a complete range of cylinder accessories to assure you of greatest versatility in present or future cylinder applications.

### Rod End Accessories

Accessories offered for the rod end of the cylinder include Rod Clevis, Eye Bracket, Knuckle, Clevis Bracket and Pivot Pin. To select the proper part number for any desired accessory, refer to Chart A below and look opposite the thread size of the rod end as indicated in the first column. The Pivot Pins, Eye Brackets and Clevis Brackets are listed opposite the thread size which their mating Knuckles or Clevises fit.

### Chart A

Thread Size	Mating Parts			Mating Parts			Alignment Coupler

Consult Factory

<sup>c</sup>For alignment coupler dimensions, see Section C.

<sup>†</sup>Cylinder accessory dimensions conform to NFPA recommended standard NFPA/T3.6.8 R1-1984. NFPA recommended standard fluid power systems — cylinder — dimensions for accessories for cataloged square head industrial types. Parker adopted this standard in April, 1985. Eye Brackets or Mounting Plates shipped before this date may have different dimensions and will not necessarily interchange with the NFPA standard. For dimensional information on older style Eye Brackets or Mounting Plates consult Drawing #1449805 or previous issues of this catalog.

NOTE: For economical accessory selection, it is recommended that rod end style 4 be specified on your cylinder order.

### Accessory Load Capacity

The various accessories on Pages 48 and 49 have been load rated for your convenience. The load capacity in lbs. shown on page 49, is the recommended maximum load for that accessory based on a 4:1 design factor in tensions. (Pivot Pin is rated in shear.) Before specifying, compare the actual load or the tension (pull) force at maximum operating pressure of the cylinder with the load capacity of the accessory you plan to use. If load or pull force of cylinder exceeds load capacity of accessory, consult factory.

### Mounting Plates

Mounting Plates for Style BB and Style BC (Clevis mounted) cylinders are offered. To select proper part number for your application, refer to Chart B, above right.

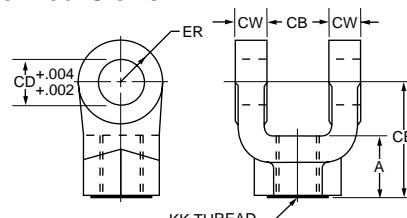

### Chart B

Mtg. Plate	Series 2A
Part No.	Bore Size
74076‡	1"
69195	11/2", 2", 21/2"
69196	31/4", 4", 5"
*85361	6", 7", 8"
69198	10"
*85362	12"
*85363	14"

<sup>‡</sup>Mounting plate for 1" bore single lug BC & BB cylinder mounting style is Clevis Bracket PN 74076.

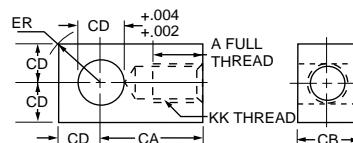

## Series 2A Heavy Duty Air Cylinders

### Female Rod Clevis

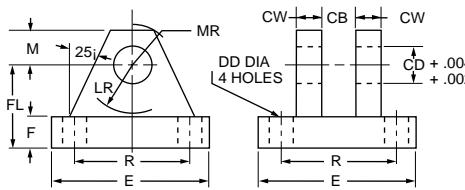

Order to fit thread size.

### ① Knuckle (Female Rod Eye)

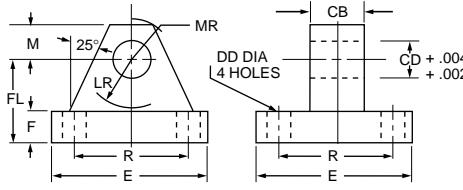

Order to fit thread size.

### Clevis Bracket for Knuckle

Order to fit Knuckle.

### ♦ Mounting Plate or ♦ Eye Bracket

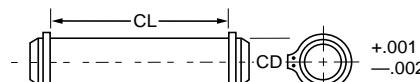

②

1. When used to mate with the Rod Clevis, select from Chart A.

2. When used to mount the Style BB or BC cylinders, select from the Mounting Plate Selection Table. See Chart B at lower left.

### ⑧ Pivot Pin

②

1. Pivot Pins are furnished with Clevis Mounted Cylinders as standard.

2. Pivot Pins are furnished with (2) Retainer Rings.

3. Pivot Pins must be ordered as a separate item if to be used with Knuckles, Rod Clevises, or Clevis Brackets.

For additional information – call your local Parker Cylinder Distributor.

\*Cylinder accessory dimensions conform to NFPA recommended standard NFPA/T3.6.8 R1-1984, NFPA recommended standard fluid power systems — cylinder — dimensions for accessories for catalogued square head industrial types. Parker adopted this standard in April, 1985. Eye Brackets or Mounting Plates shipped before this date may have different dimensions and will not necessarily interchange with the NFPA standard. For dimensional information on older style Eye Brackets or Mounting Plates consult Drawing #144805 or previous issues of this catalog.

†See Accessory Load Capacity note on page 48.

‡These sizes supplied with cotter pins.

†Includes Pivot Pin.

‡Consult appropriate cylinder rod end dimensions for compatibility.

For Cylinder Division Plant Locations – See Page II.

## How to Order Series 2A Cylinders

### Data Required on All Cylinder Orders

When ordering Series 2A cylinders, be sure to specify each of the following requirements:

**Note:** Duplicate cylinders can be ordered by giving the SERIAL NUMBER from the nameplate of the original cylinder. Factory records supply a quick positive identification.

**Bore:** Specify bore in inches.

**Mounting Style:** Specify your choice of mounting style — as shown and dimensions in this catalog. If double rod is wanted, specify "with double rod".

**Series Designation (2A)**

**Length of Stroke**

**Piston Rod Diameter:**

Specify rod diameter or rod code number. In Series 2A cylinders, standard rod diameters (Code No. 1) will be furnished if not otherwise specified, unless length of stroke makes the application questionable.

**Piston Rod End Thread Style:**

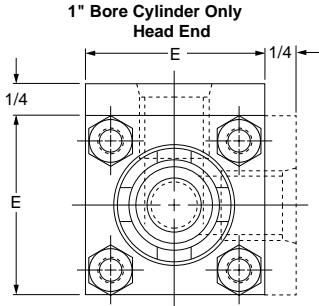

Give thread style number or specify dimensions. Thread style number 4 will be furnished if not otherwise specified.

**Cushions (If required):**

Specify "Cushion-head end", "Cushion-cap end" or "Cushion-both ends" as required. If cylinder is to have a double rod and only one cushion is required, be sure to specify clearly which end of the cylinder is to be cushioned.

**Additional Data:**

Additional data is required on orders for cylinders with special modifications and cylinders for water hydraulic service. For further information, consult factory.

### Class 1 Seals

Class 1 seals are the seals provided as standard in a cylinder assembly unless otherwise specified. For further information on fluid compatibility or operating limitations of all components, see section C.

For the 2A series cylinders the following make-up Class 1 Seals:  
Primary Piston Rod Seal – Nitrile with leather back-up washers

Piston Rod Wiper – Nitrile  
Piston Seals – Nitrile with polymyte back-up washers  
O-Rings – Nitrile

### Service Policy

On cylinders returned to the factory for repairs, it is standard policy for the Cylinder Division to make such part replacements as will put the cylinder in as good as new condition. Should the condition of the returned cylinder be such that expenses for repair would exceed the costs of a new one, you will be notified.

Address all correspondence and make shipments to, Service Department at your nearest regional plant listed on page VI.

### Certified Dimensions

Parker Cylinder Division guarantees that all cylinders ordered from this catalog will be built to dimensions shown. All dimensions are certified to be correct, and thus it is not necessary to request certified drawings.

### Warranty

Seller warrants the goods sold hereunder to be free from defects in material and workmanship. This warranty shall terminate eighteen months after date of shipment from Seller's plant and claims not made in writing within such period are waived.

The above warranty does not extend to goods damaged after date of shipment from Seller's plant where damage is not directly due to a defect in material or workmanship, nor does it apply to goods altered or repaired by anyone other than Seller's authorized employees, nor to goods furnished by Buyer or acquired at Buyer's request and/or to Buyer's specifications.

If the goods are in accordance with or in reference to an engineering drawing specified by or furnished to the customer, the specifications and information on the drawing shall be applicable in determining such correct use, operation and application.

When claiming a breach of warranty, Buyer must notify Seller promptly whereupon Seller will either examine the goods at their site, or issue shipping instructions for return to Seller (transportation costs prepaid by Buyer). When any goods sold hereunder are proved as not warranted, Seller's sole obligation under this warranty shall be to repair or replace the goods, at its option, without charge to Buyer.

**The above warranty comprises Seller's sole and entire warranty obligation and liability to Buyer, its customers and assigns in connection with goods sold hereunder. All other warranties, express or implied, including but not limited to, warranties of merchantability and fitness, are expressly excluded.**

For additional information – call your local Parker Cylinder Distributor.

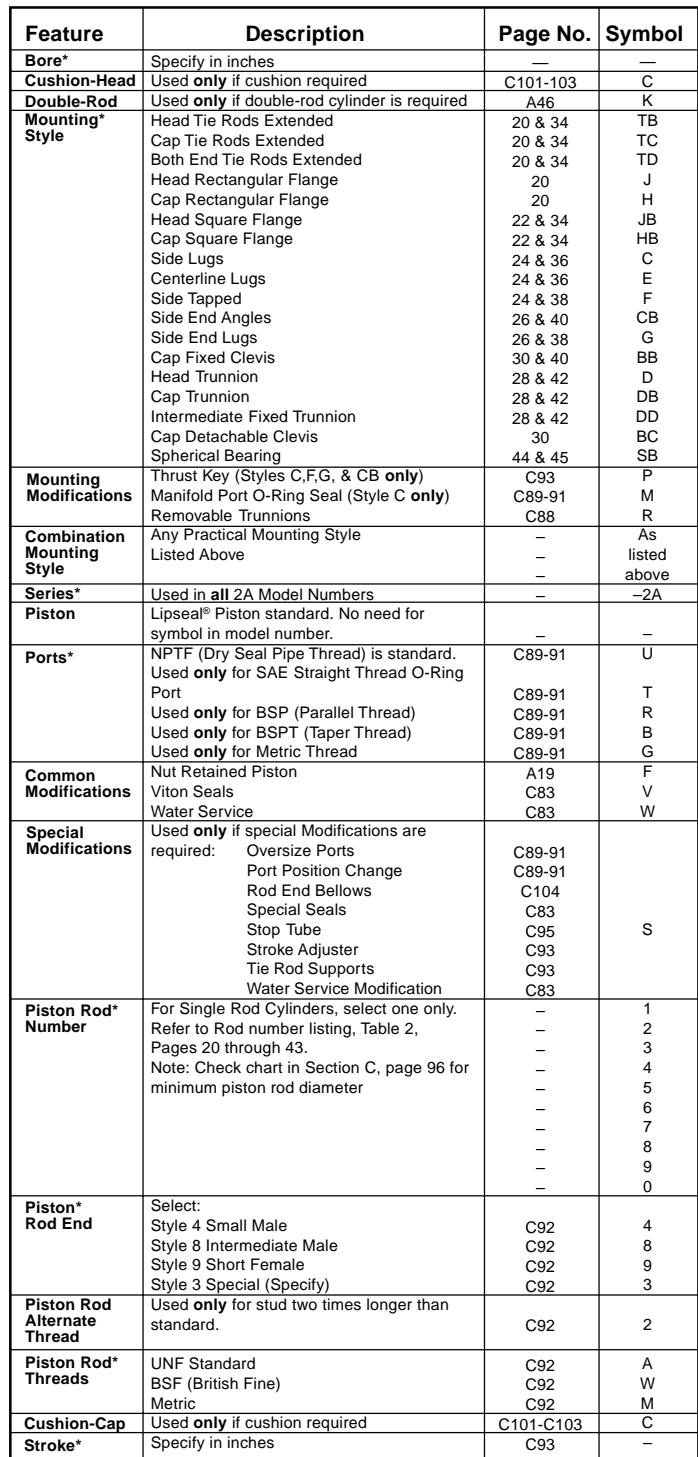

# **Series 2A**

## **Heavy Duty Air Cylinders**

## Model Numbers

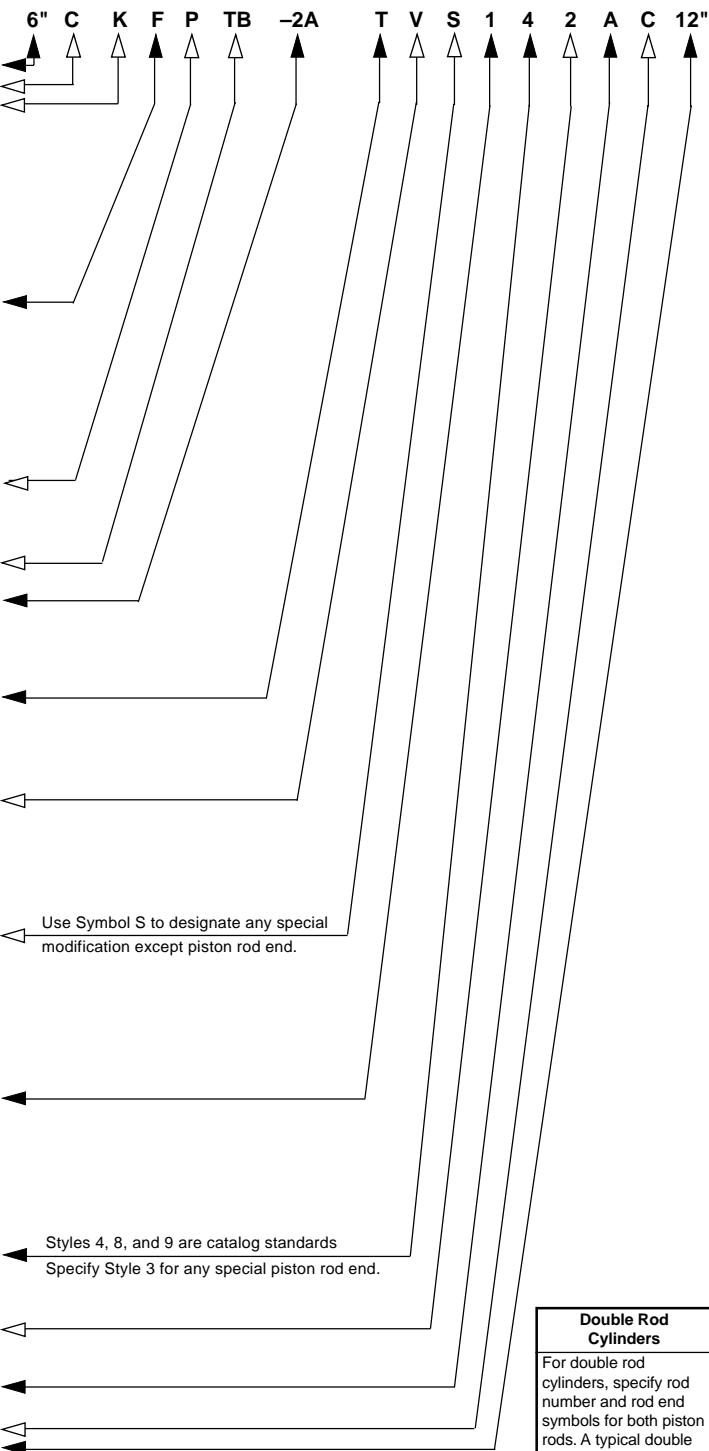

## **Series 2A Model Numbers – How to Develop Them – How to “Decode” Them**

Parker Series 2A cylinders can be completely and accurately described by a model number consisting of coded symbols. For single rod cylinders a maximum of 16 places for digits and letters are used in a prescribed sequence to produce a model number. Only eight places are needed to completely describe a standard non-cushioned Series

2A cylinder. To develop a model number, select only those symbols that represent the cylinder required, and place them in the sequence indicated below.

**Note: Page numbers with a letter prefix, ie: C77, are located in section C of this catalog.**

**Double Rod Cylinders**

For double rod cylinders, specify rod number and rod end symbols for both piston rods. A typical double rod model number would be:  
6" KJ-2AU14A/14AX12"

\*Required for Basic Cylinder Model Number

**Dark Arrows Indicate Basic Minimum Model Number**

Cylinder serial numbers are factory production record numbers and are assigned to each cylinder, in addition to the model number.

For Cylinder Division Plant Locations – See Page II.
